**All policies are the responsibility of the leadership team to own, deliver, disseminate, monitor and review**

### **Purpose**

This policy sets out the principles under which we will consider the award of grants to groups and organisations from our Selwood Housing stronger communities fund. Grants from this fund help support projects designed to make our communities better places to live in, as set out in our corporate priorities.

### **Underpinning principles**

We must comply with the Regulator of Social Housing Governance and Financial Viability Standard – 2015, the Neighbourhood and Community Standard – 2015 and the Tenant Involvement and Empowerment Standard – 2017.

We are also governed by the Companies Act 2006 and the Selwood Housing Society Limited Articles of Association in relation to the spending of funds.

### **Policy detail**

#### **Definition of community**

For the purposes of this policy, the term 'community' refers not only to a geographical area but also to a demographic.

#### **Funding**

The source of funding for the Selwood stronger communities fund comes from some of our partners who supply services to us, and who wish to contribute small sums of money to the fund as part of the procurement process. Any contribution made does not affect the outcome of the procurement but does provide a source of income for community benefit.

The stronger communities fund budget for any one year is £20,000, which for the purposes of flexibility has been set below the sum in the Nationwide loan agreement covenant.

### **Grants for community projects**

Grants under this policy which are made through the fund are for community projects that help to deliver at least one of the following outcomes.

- ✚ Projects which benefit or provide services to our residents and tenants or community initiatives in our neighbourhoods
- ✚ Promoting tolerance, understanding and respect between different groups in our communities, as well as supporting vulnerable people.
- ✚ Involving more people in the life of their community and in local decision making, strengthening existing community groups and supporting the formation of new ones.
- ✚ Helping residents to learn new skills or improve existing ones, thereby fostering self-reliance, confidence and independence.
- ✚ Improving the appearance of the local area or making it a better place to live in, but not where this is the responsibility of another organisation.

### **Principles associated with the awards of grants**

- ✚ The maximum grant for any one project is £5,000 but there is no minimum grant. Applications for grants will be considered by the involvement manager.
- ✚ The process for evaluating and awarding grants will be fair, transparent and accountable. Organisations and groups will only receive funding if they have suitable governance arrangements in place, and as a result of this we are unable to fund individuals.
- ✚ We will fund not only new projects but also existing ones, although we will not provide retrospective funding. Revenue costs will only be funded for a strictly limited period, and applicants will need to show how these costs will be met once that period has ended.
- ✚ We will normally only consider one grant application from a group or organisation in any one financial year, and will endeavour to ensure that

grants are awarded across a wide range of communities to ensure fairness.

- ✚ Applicants can only use the grant for the purpose for which it was awarded, and must agree to repay it if it cannot be used for that purpose. They must also agree to refer to the funding they receive from us in any promotional material.
